

# BOOST YOUR BACKGROUND CHECK

## Continuous Screening Helps You Stay Safe and Informed After the Hiring Process is Complete

Background checks are a crucial component of your hiring process — a way to **protect your people and your reputation**.

But a background check **only covers up to the day it is run**. If one of your employees commits an offense or is arrested after the initial check, you may have **no way of finding out**.

### You risk damages to your:

- Employees
- Customers
- Reputation
- Legal good standing
- Profit margin and financial investment

## Protect Your Business with Continuous Screening

**Continuous Screening** boosts your background check power from once-ever to ongoing, providing **daily monitoring of your employees' criminal records** throughout their time of employment, and providing **real-time alerts** when a new criminal record is located.

### Uncover a wide range of charges and offenses on an ongoing basis, including:

- ✓ Arrest data
- ✓ County court record data
- ✓ Federal court record data
- ✓ Sex offender registry data
